Information in this document is subject to change without notice.

Sony, VAIO and CLIE are trade m a r k s or registered of Sony. Microsoft, Windows, Windows Media, Outlook, Bookshelf and other Microsoft products are trademarks or registered trademarks of Microsoft Corporation in the United States and other countries. The word Bluetooth and the Bluetooth logo are trademarks of Bluetooth SIG, Inc. AMD,AMD logo, AMD Duron and combinations there of, 3Dnow!, are trademarks of Advanced micro Devices, Inc. Intel Inside logo, Pentium and Celeron are trademarks or registered trademarks if Intel Corporation. Transmeta, the Transmeta logo, Crusoe processor, the Crusoe logo and combination there of are trademarks of Transmeta Corporation in the USA and other countries. Graffiti, Hotsync, PalmModem, and palm OS are registered trademarks, and the Hotsync logo and Palm are trademarks of Plam,Inc.or its subsidiaries. (M)and Motrola are trademarks of Motrora, Inc. Other Motrola products and services with (R) mark like Dragomball are the trademarks of Motrola, Inc. All other names of systems, products and services in this manual are trademarks or registered trademarks of their respective owners.In this manual, the (TM)or(R)mark are not specified.

Caution Markings foe Lithium/Ion Battery-

The following or similar texts shall be provided on battery pack of equipment or in both the operating and the service instructions.

CAUTION: Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the Manufacturer'

CAUTION: The battery pack used in this device may present a fire or chemical burn hazard if mistreated. Do not disassemble, heat above 100℃(212℉) or incinerate. Dispose of used battery promptly. Keep Away from children..

CAUTION: Changing the back up battery.

· Overcharging, short circuiting, reverse charging, multilati on or incineration of the cells must be avoided to prevent one or more of the following occurrences; release of toxic materials, release of hydrogen and/or oxygen gas, rise in surface temperature.

· If a cell has leaked or vented, it should be replaced immediately while avoiding to touch it without any protection..

Service and Inspection Precautions

***1.Obey precautionary markings and instructions**

* Labels and stamps on the cabinet, *chassis, and components are as *requiring special precautions. Be *sure to observe these precautions, *as well as all precautions listed in *the operating manual and other *associated documents..

***2.Use designated parts only**

*The set's components possess important safety *characteristics, such as noncombustibility and the *ability to tolerate large voltages. * Be sure that replacement parts possess the same *safety characteristics as the originals. Also *remember that the mark, *which appears in circuit *diagrams and parts lists, denotes components that *have particularly important safety functions be extra *sure to use only the designated components.

***3. Always follow the original design when *mounting parts and routing wires ***

*The original layout includes various *safety features, such as inclusion of *insulating materials (tubes and tape) and *the mounting of parts above the printer *board. In addition, internal wiring has *been routed and clamped so as to keep it away from hot or high-voltage parts. When mounting parts or routing wires, therefore, be sure to duplicat the original layout.

4. Inspect after completing service

After servicing, inspect to make Sure that all screws, components, And wiring have been returned to their original condition. Also check the area around the repair location to ensure that repair work has caused no damage, and confirm safety.

5.When replacing chip components.

Never reuse components. Also remember that the negative side of tantalum capacitors is easily Damaged by heat.,

6.When handing flexible print boards.

· The temperature of the soldering-Iron tip shoul be about 270℃.

· Do not apply the tip more than three times to the same pattern.

· Handle patterns with care; never apply force

Caution: Remember that hard disk drives are easily damaged by vibration. Always handle with care.

SUBSTITUTION PARTS LIST
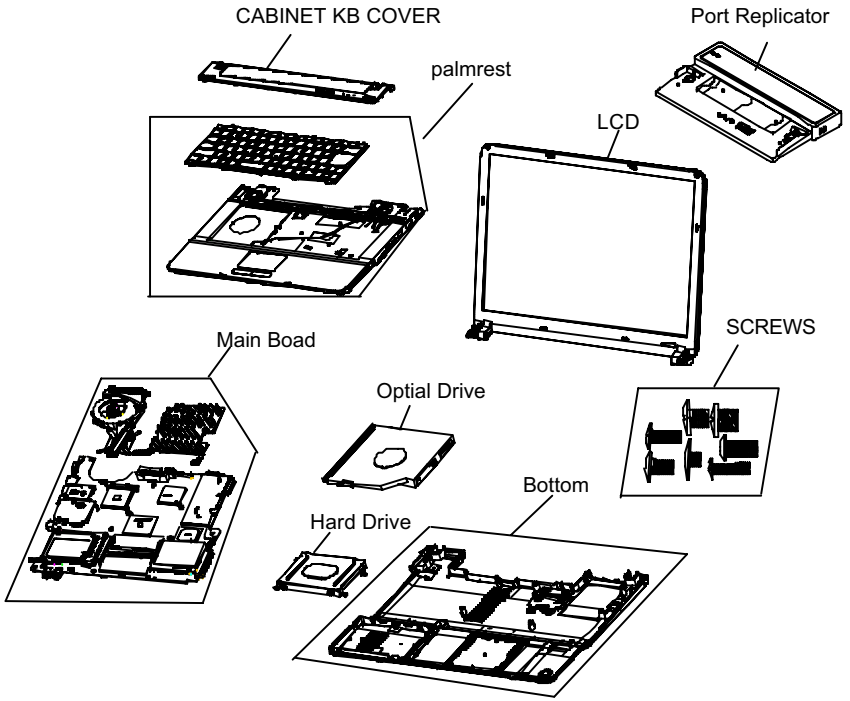
T-1.SUBSTITUTION PARTS LIST..... 4-20

DIP Switch..... 4-21

NOTE:

· The mechanical parts with no reference number in the exploded views are not supplied.
· When two or more parts are shown, use the part described first as the main part.
· The parts marked "&" are the "Customer Replacable Parts(CRP)" that can be replaced by Filed Customer Support. Especially the parts with the <&> mark require the special attention to use them. Here fore, check first whether the desired part is one of the targetted parts of the Customer Replacable Parts(CRP), or the non-targetted parts by referring to the exploded view.

The components identified by mark ⚠
or dotted line with mark ⚠ are critical for safely.
Replace only with part number specified.



Screws are supplied with a whole set.

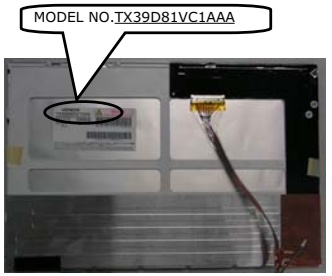
How to Use Parts Differently
FS25GP uses the two different type of LCD (QDI type,and Hitachi type).
When replacing the LCD,use the QDI type parts for the QDI type LCD,and Hitachi type parts for the Hitachi type LCD.
Replace the peripheral parts of LCD with the same type in the same way.
[How to identify the QDI and Hitachi types of parts]

Type QDI (rear view)

(A-1133-649-A)



Type Hitachi (rear view)

(A-1108-878-A)

NOTE:
- Q for QDI LCD
- H for Hitachi LCD

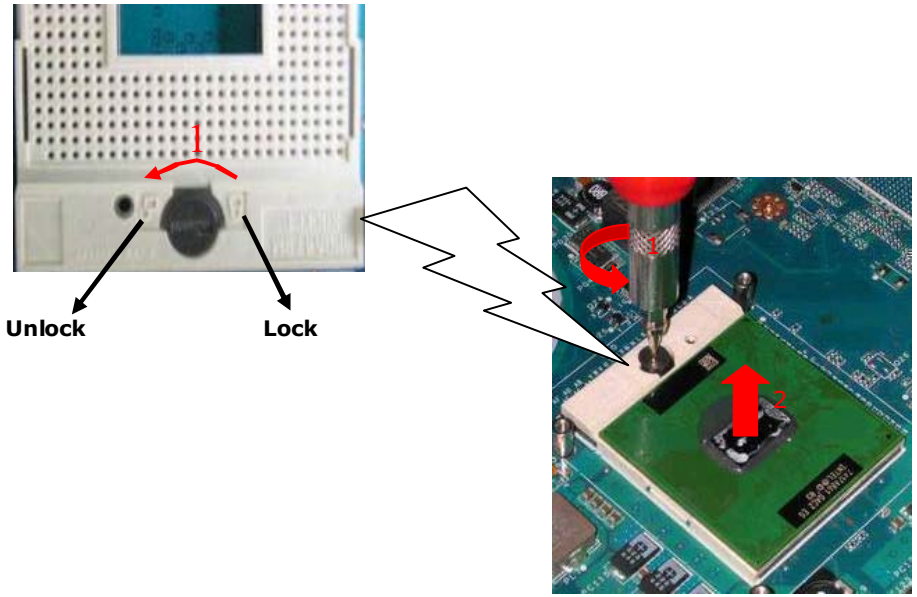
CHAPTER 5.
OTHERS

5-1.Replacing the CPU

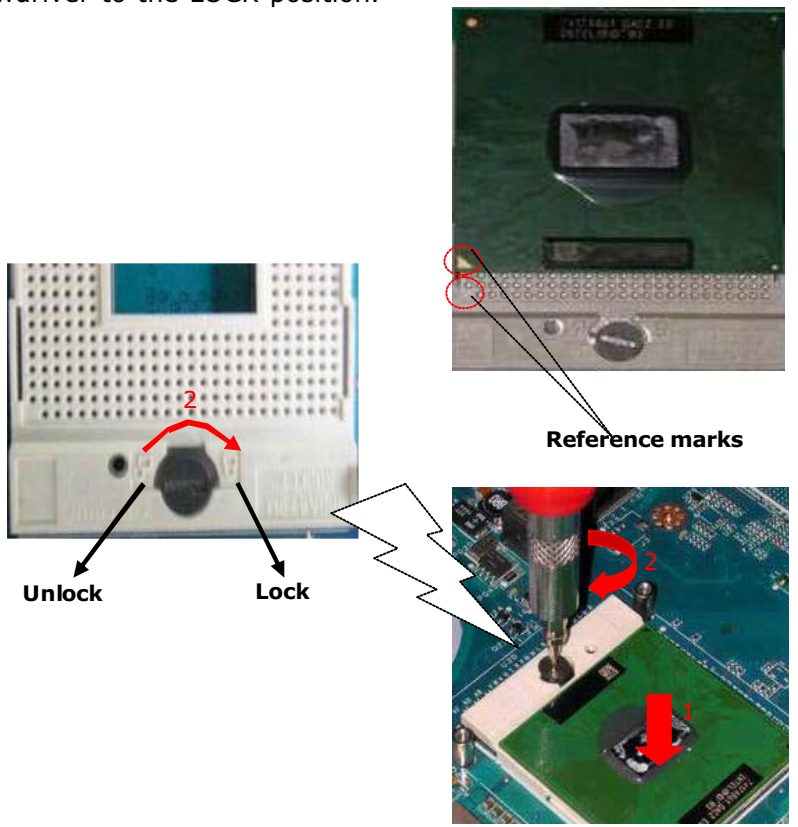
1. Removing the CPU

1. Insert a flat-blade screwdriver into the notch as shown illustration and rotate it so that the protrusion comes to the lock release position.
2. Pull the CPU gently upward to lift it out of the CPU socket



2. Installing the CPU

1. Align the triangle reference mark of the mark the CPU with that of the CPU socket and insert all the pins of the CPU to the corresponding holes of the CPU socket.
2. Insert the flat head (-) screwdriver into the specified position and rotate th screwdriver to the LOCK position.



Sony Confidential

5-2. Wiring the W-LAN Cable

* The MS02 PWA ANTENNA is installed also in the models without Wireless LAN.
  Refer to the instruction below to see how to wire the CABLE.

Using KAPTION TAPE to secure the Cable.
